Stage area dimensions: The stage should be flat, level and suitable for dance. Either a wooden dance floor or a 'Marley' dance floor is preferable. A sprung floor is ideal, but not essential. The minimum space required for the musicians is 5m x 5m. The minimum space for the dancers' performance area is 6m x 7m (depth/width configuration unimportant). Regular and thrust stage appropriate. Musicians to be placed behind the dancers. No fly floor or backstage crossing necessary.

Lighting requirements: Black box space: 2 overhead bars; one for the musicians, one for the dancer space. One boom either side of the stage for side lighting the dancers. Facility to create a warm glow on the performance space and isolated general light on the musicians. Open, indoor space with full natural light: Facility to enhance natural light if needed. Open, indoor space with limited natural light: 2 corner stands to allow a general wash on performance space. Side lighting preferable. Lighting engineer required.

Sound requirements: Sound engineer required. Musicians' channel list available on request.

Number in touring company: 8.

Touring availability: 2015: January, June-December. 2016: Full availability.

Any additional touring info: Audience friendly piece which can be adapted to certain spaces.
