**Stage area dimensions:** The stage should be flat and level although we are flexible on shape. It can be round, square, thrust, arched etc. The show is very adaptable to space. A king's throne is used and any "throne" type large chair would be advantageous if possible.

**Lighting requirements:** General warm and cold cover plus 6 specials and three colour washes. Preferably two floor birdies. We would prefer LED power cans, but they are not essential.

**Sound requirements:** Sound control position can be flexible. Must be able to plug in a laptop. High quality stereo sound system with facility to incorporate subs.

**Video requirements:** Min 4000 lumens projector (prefer 6000 if possible). VGA caballing. Ability to project 10 feet by 7 feet projectable surface, either wall, screen or cyclorama.

**Number in touring company:** 5.

**Touring availability:** Very flexible from November 2014 onwards.

**Any additional touring info:** N/A
