Stage area dimensions: Min; 9m (L) x 9m (W) x 3m (H).

The installation can be site-responsive and scaled depending on the venue or setting.

Lighting requirements: Locally sourced ambient light.

A venue specific plan will be drawn up for each location.

Lighting technician required for install and operating, with consultation on design.

If no technical lighting expertise available at venue, remote lighting designer can provide a detailed lighting plan.

Sound requirements: 4x speakers on stands (Genelec 1029A or similar spec), 1x sub-woofer, Midas PRO (or equivalent) sound desk.

The installation is operated from a laptop running Ableton and an audio interface (this can be provided by artist if a short run).

We require 5 lines to the mixing desk and individual channels for each speaker.

A clean 16A supply is required.

Venue to provide sound technician for install and operating.

Video requirements: N/A.

Number in touring company: 1-2.

Touring availability: Please contact company.

Any additional touring info: For further information on technical specifications and site-responsive nature of the installation, please contact company.

Possibility for indoor or outdoor installation. A quiet space with ventilation is essential.
