Stage area dimensions: Min;
4200 mm (D) x 5500mm (W) x 3500 (H).

Ideal stage area requirement:
8000mm (D) x 8000mm (W) x 5000mm (H).

Lighting requirements: We tour a self contained lighting rig and operate from a ETC nomad/Laptop.

We need access to 13amp power.

4 x Booms with (per boom); 2 x Chauvet DJ Core Par 40, 1 x ETC Source4 Lustr 36', 2 x stage weights. 4 x RGB Spectra Prolight Batten, which will be integrated into the set, under the walkways. 4 x Chauvet DJ ColorBand Pix, which will be integrated into the set, under the walkways. DMX. RCDs.

Sound requirements: We operate off a laptop computer and just need to plug into whatever stereo sound system a venue may have.

We also tour our own portable PA system and small mixing desk if venues do not have their own PA systems.

We require access to 13amp power.

Video requirements: N/A.

Number in touring company: 3.

Touring availability: Please contact the company.

Any additional touring info: We need access to a tap as we are filling 405L of water on stage. We are touring hot water urns if there is no hot water available. We tour our own hoses, connectors and pumps to drain the pool. We need access to a sink or a drain outside to empty the pool.

We need parking for 1 x LWB van.
