TINDERBOX ORCHESTRA

Company Contact: Claire Docherty
claire@tinderboxcollective.org
+44 (0)7784 785 744

Stage area dimensions: The orchestra all stand up when they perform. The minimum stage size to accommodate the band is around 6m x 5m, depending on the number of players in the band.

Lighting requirements: We do not have specific lighting requirements, and can work with whatever the venue has available.

Sound requirements: We usually require a professional quality sound system and a high quality, professional mixing console, with 32 or 48 channels. We generally require a minimum of 6-8 monitors depending on the size of the band. Note: we also have our own fully powered, portable "street-band" setup which would allow us to perform anywhere in the UK with a good quality sound.

Video requirements: N/A

Number in touring company: 16-22 (Depending On Stage Size/band lineup)

Touring availability: We are extremely interested in touring and would try and make ourselves available to accommodate the booker.

Any additional touring info: The orchestra is part of the wider Tinderbox Collective, a vibrant community of young people, musicians, artists and youth workers in Scotland. As well as performing shows, we are proficient in the delivery of a range of music workshops suitable for children, young people, families and communities. We also often collaborate with local artists and bands, arranging people's music for the orchestra and performing together for shows. We would be interested in a residency model that utilises these strengths in local collaborations and community engagement alongside performances if this were of interest.
